Preface

Commercial Accommodation Monitor: December 2018 – Central Otago presents comprehensive and impartial information on short-term commercial accommodation for the Central Otago Regional Tourism Organisation (RTO) area, from the Accommodation Survey. This survey is run by Stats NZ on behalf of the Ministry of Business, Innovation & Employment.

The data relates to the areas covered by the following local authority:

- Central Otago District

Comparisons of monthly data with the same month of the previous year need to be treated with caution, as data for one period may be influenced by events for which there is no equivalent in the previous period (eg Chinese New Year, Easter).

More data and commentary is available on the stats NZ website (www.stats.govt.nz).

The January 2019 monitor will be released on 14 March 2019.

Liz MacPherson

Government Statistician

Standards and further information

Percentage changes

Percentage movements are, in a number of cases, calculated using data of greater precision than that published. This could result in slight variations.

Rounding procedures

On occasion, figures are rounded to the nearest thousand or some other convenient unit. This may result in a total disagreeing slightly with the total of the individual items as shown in tables. Where figures are rounded the unit is in general expressed in words below the table headings, but where space does not allow this the unit may be shown as (000) for thousands, etc.

Source

All data is compiled by Stats NZ, except where otherwise stated. Both administrative and survey data has been used in this report.

Liability

While all care and diligence has been used in processing, analysing and extracting data and information in this report, Stats NZ gives no warranty it is error free and will not be liable for any loss or damage suffered as a result of the use, directly or indirectly, of information in this report.

1 Highlights

Monthly highlights

In December 2018 compared with December 2017:

- Guest nights fell 4.7 percent to 46,681
- International guest nights rose 19.3 percent to 11,864
- Domestic guest nights fell 10.8 percent to 34,817
- The average length of stay fell from 2.82 nights to 2.70 nights
- The overall occupancy rate rose from 26.2 percent to 27.3 percent
- The occupancy rate, excluding holiday parks, was 50.5 percent in December 2018
- Accommodation capacity, excluding holiday parks, rose 3.2 percent.

Response rates for December 2018

The response rate for the Central Otago RTO area was 87 percent for December 2018.

The proportion of the origin-of-guest estimate from unadjusted data was 85 percent.

Figure 1.1

Central Otago RTO Area Monthly Guest Nights

Figure 1.2

Year ended highlights

For the year ended December 2018 compared with the previous year:

- Guest nights rose 0.9 percent to 343,442
- International guest nights rose 6.2 percent to 86,335
- Domestic guest nights fell 0.7 percent to 257,107
- The average length of stay rose from 2.26 nights to 2.29 nights
- The overall occupancy rate rose from 16.8 percent to 17.7 percent
- The occupancy rate, excluding holiday parks, was 41.4 percent for the year ended December 2018
- Accommodation capacity, excluding holiday parks, rose 2.3 percent.

(1) Reclassifications, new businesses, ceased businesses, and temporary closures may affect figures.

(2) Irregular events, such as airshows and Easter, may affect percentage changes and other figures.

(3) Occupancy rates are calculated as the ratio of used stay-unit nights to available stay-unit nights.

(4) Holiday parks often have high capacity and can mislead when included in total occupancy rates.

(5) Average length of stay is calculated as the ratio of guest nights to guest arrivals.

(6) Capacity is calculated as the number of available stay-units multiplied by the number of days in the month.

3 Origin of guests

In December 2018, international guests accounted for 25.4 percent of all guest nights in the Central Otago RTO area. When compared with December 2017, the number of international guest nights spent in the area in December 2018 was up 19.3 percent to 11,864. Domestic guest nights decreased 10.8 percent, to 34,817, for the same period.

The proportion of the origin-of-guest estimate from actual data was 85 percent for December 2018.

4 National results

In December 2018, a total of 4,199,000 guest nights were spent in short-term commercial accommodation in New Zealand, an increase of 57,000 nights (1.4 percent) from December 2017. North Island guest nights were relatively unchanged (up 1,000 or 0.1 percent) while the South Island recorded an increase (up 55,000 or 3.1 percent).

Three of the four accommodation types recorded an increase in guest nights in December 2018, compared with December 2017. Hotels had the largest increase in guest nights (up 39,000 or 3.0 percent), followed by holiday parks (up 22,000 or 1.9 percent) and motels (up 19,000 or 1.6 percent). Backpackers had the only decrease in guest nights (down 24,000 or 4.6 percent).

For the year ended December 2018, there were 40,367,000 guest nights, an increase of 903,000 (2.29 percent) from the previous December year.

Refer to Table 4.1 for comparisons of data.

5 Regional comparison

In December 2018, Mackenzie recorded the largest increase in guest nights (up 20,000 or 23.8 percent) from December 2017. This was followed by Queenstown (up 17,000 or 4.9 percent), Canterbury (up 13,000 or 3.4 percent), Coromandel (up 10,000 or 8.0 percent), and Auckland (up 8,000 or 1.3 percent).

Rotorua recorded the largest decrease (down 12,000 or 5.0 percent), followed Hawke's Bay (down 9,000 or 6.9 percent), Taupo (down 6,000 or 4.5 percent), Hurunui (down 4,000 or 11.1 percent), and Taranaki (down 3,000 or 4.9 percent).

| Dunedin | 61.8 | 67.9 | 38.1 | 43.1 | 55.6 | 58.9 |
| Clutha | C | 44.6 | C | 22.7 | 30.0 | 40.5 |
| Fiordland | C | 72.5 | C | 57.5 | 64.6 | 68.6 |
| Southland | 49.9 | 46.6 | 37.9 | 27.8 | 39.7 | 44.9 |
| Total | 69.6 | 62.4 | 48.2 | 30.8 | 49.9 | 60.8 |

(1) Occupancy rates are calculated as the ratio of stay unit nights to monthly capacity.

(2) Occupancy rates excluding holiday parks are included because the capacity of holiday parks can distort the total occupancy rates.

6 Accommodation Survey technical notes

Data source

We collect data from accommodation providers or their representatives each month, mostly via a postal survey.

Coverage

The Accommodation Survey covers most short-term commercial accommodation in New Zealand.

The target population for this survey is all accommodation providers with the following characteristics:

- operating on a commercial basis
- providing mainly short-term (less than one month) accommodation
- economically significant (generally meaning being GST-registered and having a turnover of at least \$30,000 per year)
- included in class 4400 (accommodation) or class 4520 (pubs, taverns, and bars) in ANZSIC06 (Australian and New Zealand Standard Industrial Classification 2006)
- classified to 'hotels', 'motels', 'backpacker accommodation', or 'holiday parks'.

Excluded:

- hosted accommodation (such as 'bed & breakfast' establishments)
- marine vessels (such as cruise ships)
- private dwellings
- tramping huts (non-commercial)
- event-specific accommodation (such as temporary campervan parks)
- businesses that cease operation or no longer provide short-term commercial accommodation
- businesses that temporarily shut down (eg for renovations) – we remove them from the survey until they re-open.

Accommodation type classification

The predominant capacity provided by a business determines the accommodation type. For instance, if the business provides both motel and camping ground accommodation, but the majority of its stay units are motel rooms, then we classify it as a motel. We use the New Zealand Accommodation Classification, broadly defined below:

- hotels (including resorts)
- motels (including motor inns and serviced apartments)
- backpacker accommodation (including short-stay hostels)
- holiday parks (including caravan parks and camping grounds).

Confidentiality

'C' symbols are used in the tables where information has been suppressed. We do not release data from individual businesses.

Changes to survey content

Establishments may change the way they operate over time. If they do, they may be reclassified from one accommodation type to another. For example, if a holiday park adds sufficient motel units that it is operating more as a motel than a holiday park, it will be subject to reclassification to the 'motels' accommodation type. This type of change will tend to reduce surveyed guest nights and other figures for holiday parks (because there would be one fewer holiday park) while boosting guest nights and other figures for motels (because there would be one more motel).

Guest night and other movements, where the latest month is compared with the same month of the previous year, are affected for 12 months from the time that any reclassification is done. After 12 months, the reclassified establishment will appear in the same accommodation type in both comparison months.

Reclassifications of establishments are not the only changes that affect survey content and figures for the Accommodation Survey:

- When establishments temporarily cease operations, we take them out of the survey until they re-open. These changes affect figures for the number of establishments and available capacity.
- Businesses that start up, shut down, or move into or out of the short-term commercial accommodation industry also affect survey figures.

Survey errors

This survey aims for 100 percent coverage of the accommodation businesses in New Zealand (a full census). However, in practice, the overall response rate is usually between 76 and 80 percent. We estimate values for the remaining units based on the characteristics of similar establishments in the same or similar regions. This introduces unknown errors into the estimates, and users of the data should bear this in mind. The size of these unknown errors is difficult to quantify.

Other errors include respondent error, and errors in coverage, classification, and processing. Our editing processes identify and remove many errors, but some will likely remain. We cannot quantify the effect of the remaining errors.

Comparability

Accommodation Survey statistics are not always on the same basis as statistics from other sources. For example, 'average length of stay' in the Accommodation Survey is for all guests (domestic plus international), but in the [International Visitor Arrivals to New Zealand](#) reports, it is only for international guests.

More information

For further information on the Accommodation Survey, refer to webpage <https://www.stats.govt.nz/topics/accommodation>
