Questions on increases to rates set by the cost of treatment regulations

Question 1

Do you agree that tailored payment increases reflecting wage increases in the main occupational groups (option D in discussion document), which will result in the increases detailed in Table 4 reproduced below, best meets the following policy objectives:

- Claimants are able to access treatment, meaning co-payments should be affordable
- Costs to ACC are sustainable, affordable and predictable (gradual increases)
- Payments are not too dissimilar between the health and ACC systems.

If you do not agree, why not? Please provide reasons for your view.

The proposed increase seem fair and reasonable compared with the increases in the cost of living as seen in the CPI over recent years. However, use of CPI and wage growth data does not accurately capture the pressures on small businesses such as those providing allied health services.

According to CEIC Data, the New Zealand Producer Price Index (PPI) grew 8.5 % YoY in June 2022, compared with a growth of 8.8 % YoY in the previous quarter. Prior quarterly YoY PPI growth was 7.3%, 6.2%, 4.0%.

The increase in the NZ PPI since the April 2021 quarter have not been seen since the GFC in 2008.

The proposed increase in payment rates are a useful start on addressing the disparity in fees that health consumers face. Currently in Auckland, ACC payment covers 30% of treatment fee costs for ACC claimants.

Do you agree with introducing a new nurse practitioner and nurse combined treatment rate, and the specific rates (before the general increase proposed in section 3) listed in Table 6 reproduced below? Please provide reasons for your view.

Table 6: Nurse Practitioner and Nurse combined treatment rates
