Additional feedback

25 Do you have any additional feedback that you would like to provide on the EDGS or the options we have proposed? If yes, please provide below.

Regarding the Energy Outlook product in question 24 above, electricity plays a major role in our emissions inventory - however insights and data are generally out of date which makes it difficult for us to keep our modelling up to date. We consider a more frequent Outlook Update would be extremely beneficial to the industry.

Thank you for completing this submission template, we appreciate you taking the time. We will use your feedback to inform our modelling for EDGS 2023 and will refine the draft assumptions based on feedback received through consultation.
