Southland Executive Summary

The purpose of this report is to provide an overview of Southland's migrant population and migration trends. The report shows trends to 2015/16 and compares recent immigration patterns with previous years.

More Skilled Migrant Category principal applicant approvals over the past year in Southland

In 2015/16, one percent (or 155 people) of New Zealand's Skilled Migrant Category principal applicants (permanent migrants) found employment in the Southland region. This is an increase of 15 percent on the previous year. The Philippines, India and the United Kingdom were the top source countries of skilled migrants in the region.

The most common occupations of these migrants in Southland were Registered Nurses (14 percent) and Livestock Farmers (10 percent).

Essential Skills temporary workers increased over the past year in Southland

In 2015/16, 1,074 people were approved for Essential Skills work visa in the region. This is an increase of 15 percent over the previous year. The Philippines and the United Kingdom were the top source countries for Essential Skills workers in the region.

The most common occupations of Essential Skills workers in Southland in 2015/16 were Livestock Farmers (29 percent) and Livestock Farm Workers (11 percent).

International student numbers continue to grow in Southland

Southland has one of the smallest shares of student visa approvals in the country. In 2015/16, 934 international students were approved for study in Canterbury, making up one percent of the total student visas granted. This is an increase from 767 in the previous year.

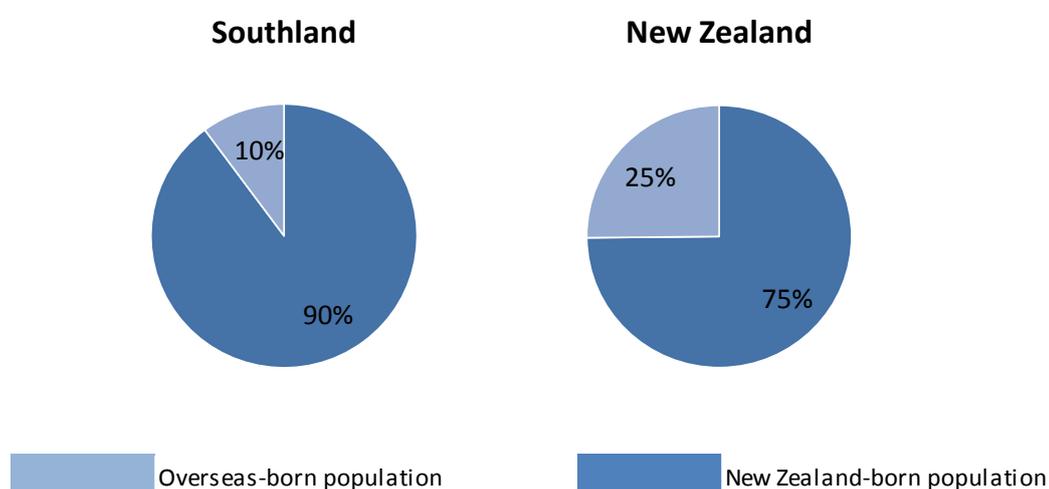

Introduction

Southland is New Zealand's southernmost region and is primarily known for its five iconic tourist destinations: Milford Sound, Doubtful Sound, Fiordland National Park, the Southland Scenic Route and Stewart Island.

As at 30 June 2016, Southland region's population was 98,000¹, which represents two percent of New Zealand's total population.

According to the 2013 Census, 10 percent of the region's population were born overseas compared with 25 percent for New Zealand overall. The majority of new migrants² coming into Southland were from Asia (50 percent) and the United Kingdom and Ireland (14 percent).

Figure 1: Proportion of the overseas-born and the New Zealand-born population in the Southland region and New Zealand overall, 2013

Source: 2013 Census of Population and Dwellings, Statistics NZ

New Zealand's population is affected by migration flows. Apart from new resident migrants, this includes the arrival and departures of temporary migrants on work and student visas.

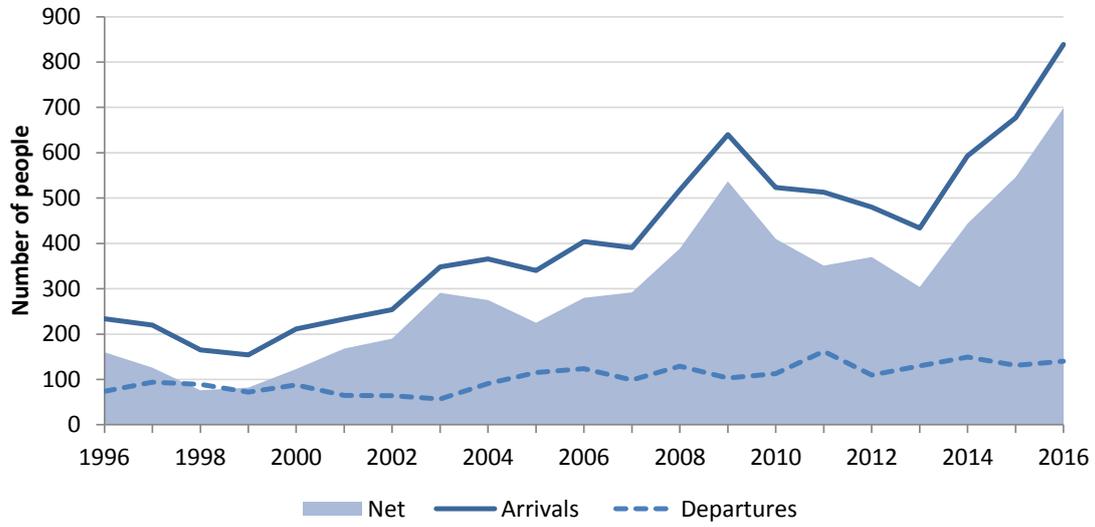

Figure 2 below shows that there have been more permanent and long-term³ arrivals of non-New Zealand and non-Australian citizens than departures in the region. In June 2016, there were 839 permanent and long-term arrivals in Southland, an increase from 677 arrivals recorded the previous year. Permanent and long-term departures totalled to 140 in 2016. This resulted in a net gain of 699 in 2016 which is the highest net gain recorded in the region over the last 20 years. Note that these figures are based on people's intention rather than their actual stay in New Zealand.

¹ Subnational Population Estimates as at 30 June 2016 (provisional), Statistics NZ.

² Those who have been living in New Zealand for under two years at the time of the 2013 Census.

³ An arrival or departure is 'permanent and long-term' if the intended length of stay or absence is 12 months or more.

Figure 2: Annual permanent and long-term migration (excluding New Zealand and Australian citizens) to the Southland Region, year to June 1996-2016

Source: Permanent and long-term statistics, Statistics NZ

Note: Net migration flow is the difference between the number of permanent and long-term (PLT) arrivals and departures.

Residence Approvals

Permanent residence provides a person with the right to live in New Zealand and to gain access to all the work, business, education, property, and health privileges available to New Zealanders.

People who wish to migrate permanently to New Zealand must enter through one of the three residence streams of the New Zealand Residence Programme (NZRP). These are:

- Skilled/Business Stream
- Family Stream
- International/Humanitarian Stream.

This chapter describes the trends in the number of people coming in on a residence visa rather than a number at a single point in time. After a decrease from the previous year, the number of residence approvals has increased by 21 percent from 43,085 in 2014/15 to 52,052 in 2015/16.⁴

New Zealand needs skilled migrants to contribute to skills acquisition, productivity and growth in a range of industries. Most migrants under the NZRP were approved under the Skilled/Business Stream (57 percent). Within the Skilled/Business Stream, the Skilled Migrant Category (SMC) has the largest number of residence approvals (50 percent in 2015/16). The SMC is a points-based system designed to ensure people migrating to New Zealand have the skills, qualifications and work experience that New Zealand needs.

In 2015/16, 49 percent of residence approvals under the SMC were principal applicants (13,096 people) and 51 percent were secondary applicants (12,660). Secondary applicants include partners and/or dependent children of principal applicants. Regional breakdown of data for secondary applicants is not available.

Regional data on residence approvals is only available for SMC principal applicants who specified their region of employment. The following section will focus on SMC principal applicants with a job or job offer in the Southland region.

⁴ MBIE. (2016). *Migration Trends 2015/16*

Southland context

In 2015/16, the Southland region attracted one percent (or 155 people) of the SMC principal applicants to New Zealand. This is an increase of 15 percent from the 135 approved in the previous year (see Appendix Table 1).

Source country

The Philippines continues to be the main source country of SMC principal applicants in Southland, followed by India and the United Kingdom. Together, the top three source countries represent more than half (55 percent) of the total approved SMC principal applicants in the region in 2015/16.

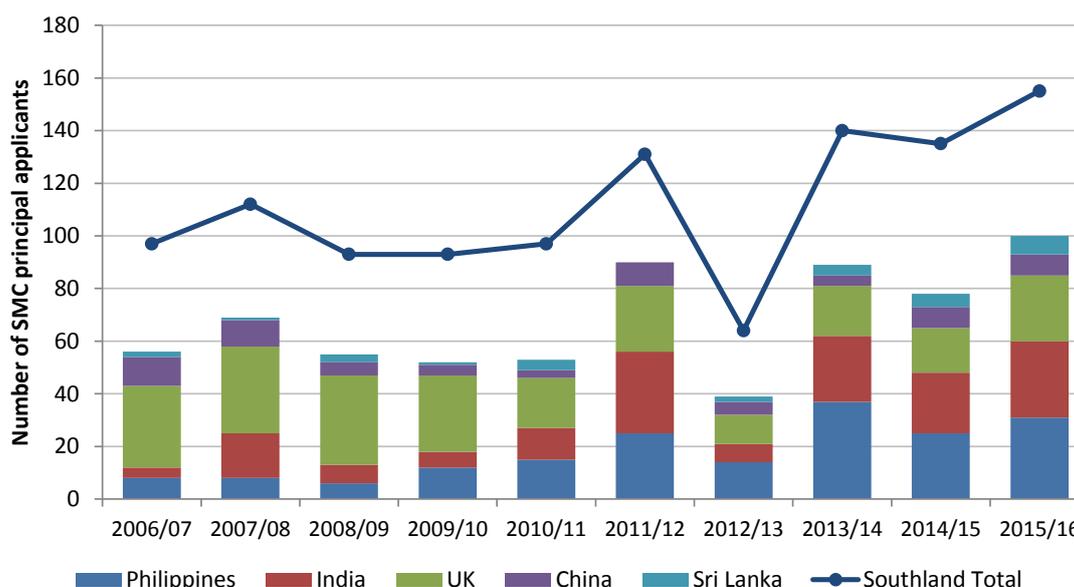

Table 1: Top source countries of Skilled Migrant Category principal applicants in Southland, 2011/12 to 2015/16

Source country of principal applicant	2011/12	2012/13	2013/14	2014/15	2015/16
Philippines	25 (19%)	14 (22%)	37 (26%)	25 (19%)	31 (20%)
India	31 (24%)	7 (11%)	25 (18%)	23 (17%)	29 (19%)
UK	25 (19%)	11 (17%)	19 (14%)	17 (13%)	25 (16%)

Source: Ministry of Business, Innovation and Employment

Figure 3 below shows that the number of SMC principal applicants coming into Southland has been generally increasing over time. The number of skilled migrants from the United Kingdom has been declining over the last ten years. The United Kingdom was the main source of skilled migrants in the region up until 2010/11. In contrast, the number of skilled migrants coming in from India and the Philippines has been increasing over the same period.

Figure 3: The top five source countries of Skilled Migrant Category principal applicants in Southland, 2006/07 to 2015/16

Source: Ministry of Business, Innovation and Employment

Occupations

Table 2 below shows the main occupations of SMC principal applicants with a job or job offer in the Southland region for the 2015/16 year. It also lists the top source countries for each occupation group.

The main occupations of skilled migrants in Southland in 2015/16 were Registered Nurses (14 percent) and Livestock Farmers (10 percent).

Table 2: Occupations of Skilled Migrant Category principal applicants with a job or job offer in Southland, 2014/15 and 2015/16

	Number of applicants ⁵		Change over the past year	Top 2 source countries for each occupation

Cafe and Restaurant Managers	10	10	n/c	India, UK
Chefs	10	8	↓	UK, Japan

Source: Ministry of Business, Innovation and Employment

Note 1: Occupations are based on the Australian and New Zealand Standard Classification of Occupations (ANZSCO). Data are reported at both a high level breakdown (ie 2-digit level ANZSCO) and a more detailed breakdown (ie 4-digit level ANZSCO) of occupations.

Note 2: Due to the small number of counts for the region, only the top five occupations are reported.

⁵ Applicants whose occupations were not coded to ANZSCO or were classified as 'responses out of the current definition of the labour force' are excluded from the count.

Temporary Workers

The temporary work policy allows people to enter New Zealand for a variety of work-related purposes. Work visas allow employers to recruit temporary workers from overseas to fill skill shortages, while still protecting employment opportunities for New Zealand workers.

There are three main work policies. These are:

- Essentials Skills policy
- Working Holiday Schemes
- Family policy.

This chapter describes the trends in the number of people coming in on a temporary work visa rather than a number at a single point in time. In 2015/16, 192,688 people were granted work visas in New Zealand, an increase of 13 percent from 170,814 in 2014/15. Of these, 16 percent were approved for the Essential Skills visa.⁶

Regional data on temporary work visa approvals is only available for Essential Skills visa holders. The next section will focus on temporary migrants who were granted Essential Skills visa for employment in the Southland region.

Essential Skills workers

The Essential Skills policy facilitates the entry of people required on a temporary basis to fill shortages where there are no suitably qualified New Zealand citizens or residents for the work offered. It is a labour market tested visa which means that employers in New Zealand have proven that they made genuine efforts to attract and recruit New Zealanders to fill a position but have been unable to find such people.

The number of approved Essential Skills workers in New Zealand has been gradually increasing over time. In 2015/16, 31,766 people were approved to work in New Zealand under the Essential Skills work policy, an increase of 11 percent from 28,548 in 2014/15. The increase in the number of temporary workers indicates an ongoing demand for labour in New Zealand.

Southland context

Southland is the sixth main region of employment for Essential Skills workers. In 2015/16, 1,074 people were approved to work in Southland under the Essential Skills work policy (see Appendix Table 2). There has been an increase of 15 percent in the number of approved workers in the region over the previous year (compared to an 11 percent increase nationwide).

Source country

Table 3 below shows the top five source countries of Essential Skills workers in Southland over the last five years. The top five source countries accounted for over half (59 percent) of the total number of Essential Skills workers coming to jobs in the region.

In 2015/16, the Philippines was the main source country of Essential Skills workers in Southland, followed by the United Kingdom.

⁶ MBIE. (2016). *Migration Trends 2015/16*

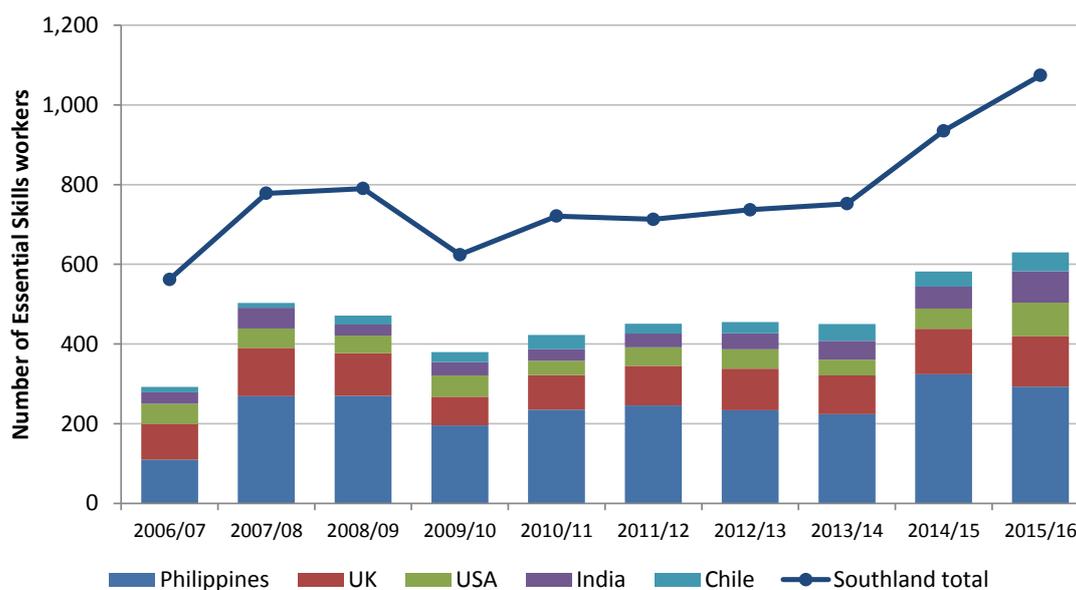

Table 3: Source country of Essential Skills workers in Southland, 2011/12 to 2015/16

Source country of Essential Skills workers	2011/12	2012/13	2013/14	2014/15	2015/16
Philippines	246 (35%)	234 (32%)	224 (30%)	324 (35%)	293 (27%)
UK	99 (14%)	104 (14%)	97 (12%)	114 (12%)	126 (12%)
USA	47 (7%)	49 (7%)	40 (5%)	51 (5%)	85 (8%)
India	34 (5%)	40 (5%)	47 (6%)	55 (6%)	79 (7%)
Chile	25 (4%)	28 (4%)	42 (6%)	38 (4%)	47 (4%)

Source: Ministry of Business, Innovation and Employment

Figure 4 below shows that the number of Essential Skills workers coming into the Southland region has been generally increasing. Over the last decade, the Philippines has clearly been the main source country of Essential Skills workers in the Southland region, most likely working in the farming sector.

Figure 4: The top five source countries of Essential Skills workers in the Southland region, 2006/07 to 2015/16

Source: Ministry of Business, Innovation and Employment

Occupations

Table 4 below shows the main occupations of approved Essential Skills workers who received an offer of employment in Southland. It also lists the main source countries for each occupation group. The most common occupations of Essential Skills workers in Southland in 2015/16 were Livestock Farmers (29 percent) and Livestock Farm Workers (11 percent).

Table 4: Occupations of Essential Skills workers in Southland, 2014/15 and 2015/16

	Number of applicants		Change over the past year	Top 2 source countries for each occupation
	2014/15	2015/16

Note: Occupations are based on the Australian and New Zealand Standard Classification of Occupations (ANZSCO). Data presented at both a high level breakdown (ie 2-digit level ANZSCO) and a more detailed breakdown (ie 4-digit level ANZSCO) of occupations.

International Students

International education makes a considerable contribution to New Zealand's economy. The economic value of international education was estimated to be \$4.0 billion in 2015/16⁷.

In 2015/16, a total of 91,261 international students⁸ were approved to study in New Zealand, an 8 percent increase from 84,856 in 2014/15.

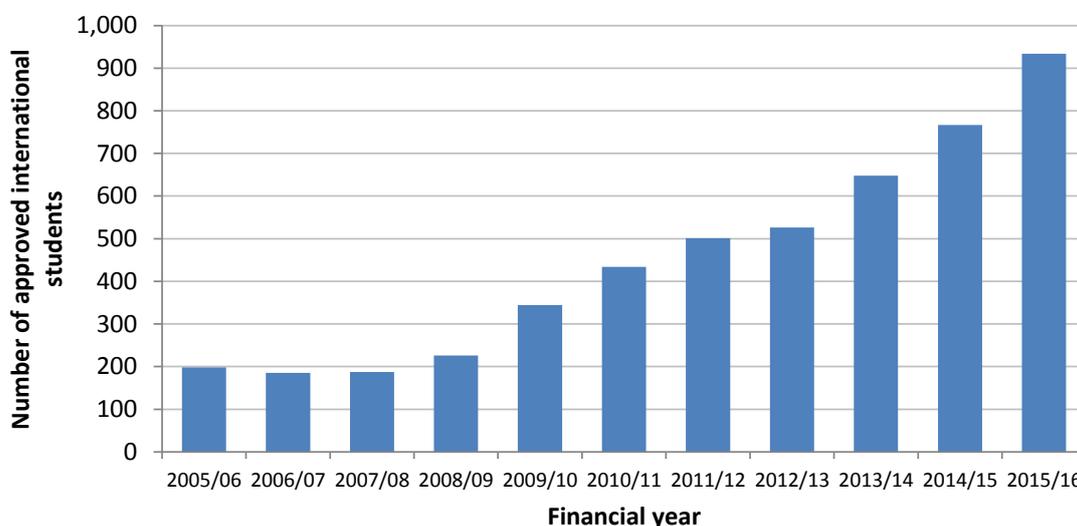

International students have identified that they chose to study in New Zealand because of the quality and cost of education, opportunities to work after graduation and to apply for residence, and opportunities to study in an English-speaking country⁹.

Southland context

International students are an important component of migration flows into New Zealand. Attracting international students into Southland plays an important role in bringing value into the region. Graduates with the skills and qualifications the region needs are encouraged to stay on and work after completing their studies.

Southland's key tertiary option is the Southern Institute of Technology - the region's most popular tertiary institute for its innovation. Southland has one of the smallest shares of student visa approvals in the country. In 2015/16, 934 international students were approved for study in Southland, making up one percent of the total student visas granted. This is an increase from 767 in 2014/15 (see Figure 5 below).

Figure 5: Approved international students in the Southland Region, 2006/07 to 2015/16

Note: This is a count of individuals approved for a student visa rather than the number of visa applications.
