

PERMITTING DECISION SUMMARY

OTC-P1

Spire Global Germany GmbH

1. Spire Global Germany GmbH is subsidiary of Spire Global Inc, a space-to-cloud data and analytics company. Spire Global Inc and its subsidiaries specialise in the collection of space-based data through its large proprietary constellation of multipurpose nanosatellites.
2. The 8 payloads under this permit, collectively known as OTC-P1, are thermal sensors.
3. Payloads are permitted in line with the [Outer Space and High-altitude Activities Act 2017](#) and the [Outer Space and High-altitude Activities \(Licences and Permits\) Regulations 2017](#).
4. Each payload has been approved by the Minister for Space, on advice from officials across agencies. When approving payloads, the Minister needs to be satisfied that:
 - a. The applicant has taken and will continue to take all reasonable steps to safely manage the operation of the payload.
 - b. The proposed operation of the payload is consistent with New Zealand's international obligations; and
 - c. The applicant has an orbital debris mitigation plan that meets prescribed requirements.
 - d. Despite being satisfied of these matters, the Minister may nevertheless decline a permit if they are not satisfied that the proposed operation of the payload is in New Zealand's national interest.
