

PERMITTING DECISION SUMMARY

Acadia X

Capella Space Corporation (Capella)

1. Capella is a United States aerospace and information services company which specialises in synthetic Aperture Radar (SAR) data products. SAR is a form of radar that is used to create 2D images or 3D reconstructions of objects.
2. Acadia X will join an existing constellation of SAR satellites operated by Capella for the purpose of Earth observation.
3. Payloads are permitted in line with the [Outer Space and High-altitude Activities Act 2017](#) and the [Outer Space and High-altitude Activities \(Licences and Permits\) Regulations 2017](#).
4. Each payload has been approved by the Minister for Space, on advice from officials across agencies. When approving payloads, the Minister needs to be satisfied that:
 - a. The applicant has taken and will continue to take all reasonable steps to safely manage the operation of the payload.
 - b. The proposed operation of the payload is consistent with New Zealand's international obligations; and
 - c. The applicant has an orbital debris mitigation plan that meets prescribed requirements.
 - d. Despite being satisfied of these matters, the Minister may nevertheless decline a permit if they are not satisfied that the proposed operation of the payload is in New Zealand's national interest.
