Vision

Do you agree or disagree with the overall vision for the minerals and petroleum sector in New Zealand?

Disagree

Why?

We do not need to lead the world because if we try to do this, we will fall in to the trap of using the rest of the world's methods and reliance on this resource

What is your vision for the minerals and petroleum sector in New Zealand?

Minerals utilised only for NZ industry and sustainable ways of accessing and mostly finding ALTERNATIVES. NO petroleum!

How can New Zealand sustainably derive value from its petroleum and minerals resources?

Using these for local industry, looking at recycling what is already available, not looking for more. NOT driven by profit but by benefit to the community

Objectives for the minerals and petroleum sector

Objective for a sector that: “Responsibly delivers value for New Zealand (a) Supporting a productive, sustainable and inclusive economy (b) Supporting New Zealand's transition to a carbon neutral economy”.

Disagree

Why?

I agree with part b: but it should be not supporting but driving/leading the transition. Part a is self negating: production can not be sustainable for either resource because they are finite reserves!!!

Objective for a sector that: “Is productive and innovative”.

Disagree

Why?

Agree with innovative only. see above

Objective for a sector that: “Is effectively regulated”.

Strongly agree

Why?

BUT should be worded STRONGLY and stringently regulated!!!

Are there any other objectives for the minerals and petroleum sector that you would like us to consider in the strategy?

Gradual decrease in this industry

Guiding principles

Principle: The environment, ecosystems, and biodiversity are respected now and in the long term.

Strongly agree

Why?

Sorry your wording is limp! respected??? they should be revered and seen as being the basis of our human existence. Without them, we all will not survive

Principle: Māori cultural interests are understood and respected.

Strongly agree

Why?

Again: what sort of wording is this? are recognised and integrated and put in the forefront of any decisions> Hmmm Treaty of Waitangi? There is a mandate for this !!

Principle: Support the transition to a carbon neutral economy by 2050.

Strongly agree

Why?

Principle: The impact on people, communities and regions are managed in a just and inclusive way.

Strongly agree

Why?

Not just managed!!! minimised!!!!

Principle: Support a circular economy by meeting resource needs through resource efficiency, recycling and reuse.

Strongly agree

Why?

Principle: Actions taken within the mineral and petroleum sector should align with the strategic direction of other related sectors and Government strategies.

Strongly agree

Why?

Do you agree or disagree with each of the following principles for the Crown?

Principle: The Crown honours its duty towards Māori as a Treaty partner, adheres to the Principles of the Treaty of Waitangi and its duty to meet settlement commitments.

Strongly agree

Why?

Principle: The Crown receives a fair financial return for its minerals and petroleum.

Disagree

Why?

NO no no, this is not about profit and money: once again you are looking at value from a monetary perspective only. The value of our minerals etc is leaving them in the ground!!!

Principle: The Crown regulates in a way that is fair, transparent, reasonable and proportionate.

Strongly agree

Why?

and responsible

Principle: The Crown honours the rights of current permit holders to continue production or exploration activities under existing permits.

Strongly disagree

Why?

well, self evident really: the longer it goes on the more we are supporting this appalling industry and its effects and the financial gains for overseas companies

Principle: The Crown makes policy decisions based on the best evidence, and accounting for the foreseeable need for minerals and petroleum, both now and for future generations.

Strongly agree

Why?

BUT not just on best evidence, also on the well being and health of Papatuanuku

Principle: The Crown proactively engages and consults with relevant stakeholders and decisions are communicated in a clear and transparent way.

Strongly agree

Why?

engages, consults and makes decisions that put the well being of NZ/ecosystems first

Do you agree or disagree with each of the following principles for Industry?

Principle: Pursue continuous improvements in health and safety.

Strongly agree

Why?

Yes but define: health and safety for who??? our country, the waterways/ the air quality, our health as people of the land

Principle: Strive to implement industry best practice in operations.

Strongly agree

Why?

strive????? you must ensure!!!

Principle: Seek innovative ways to improve the resource efficiency of extraction operations; and minimise the negative impacts of these operations.

Strongly disagree

Why?

stop extracting

Principle: Engage with stakeholders and implement management systems to understand and manage impacts, and realise opportunities for redress where needed.

Strongly agree

Why?

wording again: not manage, MINIMIZE!!!

Are there any other principles you would like us to consider in the strategy?

You know this whole strategy looks weak and toothless. The language is so smooth that any smart business man/woman could see the loopholes etc. Put Aotearoa FIRST!!, NOT profit or wanting to seem nice

Action areas intro

Action Area: Modernising the Crown Minerals Act

Strongly agree

Why?

What future actions would you like us to consider under this Action Area?

Action Area: Securing affordable resources to meet our minerals and energy needs

Strongly agree

Why?

What future actions would you like us to consider under this Action Area?

Action Area: Improving Treaty partnership

Strongly agree

Why?

What future actions would you like us to consider under this Action Area?

Action Area: Improving stakeholder and community engagement

Strongly agree

Why?

What future actions would you like us to consider under this Action Area?

Action Area: Improving industry compliance

Strongly agree

Why?

What future actions would you like us to consider under this Action Area?

Action Area: Research and investment in better mining and resource use

Strongly disagree

Why?

No, not mining, but yes resource use

What future actions would you like us to consider under this Action Area?

Are there any other action areas you would like us to consider as part of advancing this Strategy?

Other

Are there any other comments you would like to make about the “Minerals and Petroleum Strategy for Aotearoa New Zealand: 2019-2029”?

Get strong and wise about this!!! Now is your opportunity.

Otherwise, it will be too late!

Put NZ in the forefront of turning the tide against petroleum and mining
