**Business name or organisation (if applicable):**

n/a

**Position title (if applicable):**

n/a

**Is this an individual submission or on behalf of a group or organisation?**

Privacy of natural persons

**Please indicate which group you most identify with or are involved in?**

Privacy of natural persons

**Please specify the group that you most identify with**

**Please indicate which type of group your submission represents.**

**Please specify the group or organisation that your submission is on behalf of.**

**Vision**

**Do you agree or disagree with the overall vision for the minerals and petroleum sector in New Zealand?**

Strongly agree

**Why?**

Because they are about making money so they will never be environmentally or socially responsible, the fact they are ripping the public off by overcharging for petroleum products as determined and stated by the NZ Government proves this.

**What is your vision for the minerals and petroleum sector in New Zealand?**

That they go out of business and we replace them with clean fuels such as electricity.

**How can New Zealand sustainably derive value from its petroleum and minerals resources?**

It can't it is a limited resource which causes pollution by its use, it is time to stop using it as a fuel..

**Objectives for the minerals and petroleum sector**

**Objective for a sector that: "Responsibly delivers value for New Zealand (a) Supporting a productive, sustainable and inclusive economy (b) Supporting New Zealand's transition to a carbon neutral economy".**

Strongly agree

**Why?**

It isn't responsible nor can it be made to be responsible, it is all about making a dollar.

**Objective for a sector that: "Is productive and innovative".**

Strongly disagree

**Why?**

Because it isn't innovsative, it keeps trying to squeeze every last dollar of profit out of something that is destroying the planet and will only change when forced to or the planet dies.

**Objective for a sector that: “Is effectively regulated”.**

Strongly disagree

**Why?**

Because the government does not have the will to provide the resources to effectively regulate the sector.

**Are there any other objectives for the minerals and petroleum sector that you would like us to consider in the strategy?**

Getting rid of them as soon as possible.

**Guiding principles**

**Principle: The environment, ecosystems, and biodiversity are respected now and in the long term.**

Strongly agree

**Why?**

Because without it the planet is on the path for destruction and then your principle would have just been a waste of time..

**Principle: Māori cultural interests are understood and respected.**

Strongly disagree

**Why?**

Maori culture won't be around if the planet is destroyed by greed, save the planet first then worry about Maori culture.

**Principle: Support the transition to a carbon neutral economy by 2050.**

Strongly disagree

**Why?**

That is going to be too late do it sooner. 30 years of what we are currently doing will see huge destruction and death, wake up and stop deluding everyine that change can be defered until 2050.

**Principle: The impact on people, communities and regions are managed in a just and inclusive way.**

Strongly agree

**Why?**

Because we are the one who will suffer, not the rich.

**Principle: Support a circular economy by meeting resource needs through resource efficiency, recycling and reuse.**

Strongly agree

**Why?**

Because it is time to wake up before it is too late.

**Principle: Actions taken within the mineral and petroleum sector should align with the strategic direction of other related sectors and Government strategies.**

Neither agree nor disagree

**Why?**

Because the tail shouldn't wag the dog, the mineral and petroleum sector about the rich getting richer and screwing the planet for every last dollar of profit and its time the government acknowledged this.

**Do you agree or disagree with each of the following principles for the Crown?**

**Principle: The Crown honours its duty towards Māori as a Treaty partner, adheres to the Principles of the Treaty of Waitangi and its duty to meet settlement commitments.**

Strongly agree

**Why?**

Because that is the crown's contract with Maoridom, if it can't keep that then it is unlikely to keep any agreement.

**Principle: The Crown receives a fair financial return for its minerals and petroleum.**

Strongly disagree

**Why?**

because if it did there wouldn't be any poverty in this country.

**Principle: The Crown regulates in a way that is fair, transparent, reasonable and proportionate.**

Strongly disagree

**Why?**

Because there are too many politicians in the pocket of the big companies, where does National get its campaign funding from?

**Principle: The Crown honours the rights of current permit holders to continue production or exploration activities under existing permits.**

Strongly disagree

**Why?**

Because it is time to stop, we don't have any obligation to make these companies more money, the Crown's obligation is to the voters of this country not foreign businesses.

**Principle: The Crown makes policy decisions based on the best evidence, and accounting for the foreseeable need for minerals and petroleum, both now and for future generations.**

Strongly disagree

**Why?**

Because if they had been using best evidence they would have seen that using fossil fuels was going to destroy our only planet years ago, they would have seen that the companies involved in exploiting this resource are greedy and don't care for the planet they just care for the almighty dollar.

**Principle: The Crown proactively engages and consults with relevant stakeholders and decisions are communicated in a clear and transparent way.**

Strongly disagree

**Why?**

The only stakeholders are the people who live on this planet that are going to be destroyed by the ongoing misuse of fossil fuels, not the companies making a profit from it.

**Do you agree or disagree with each of the following principles for Industry?**

**Principle: Pursue continuous improvements in health and safety.**

Strongly agree

**Why?**

I don't actually they won't do anything that affects their bottom line profit.

**Principle: Strive to implement industry best practice in operations.**

Strongly agree

**Why?**

It won't happen - have we forgotten about all the disasters caused by oil spills?

**Principle: Seek innovative ways to improve the resource efficiency of extraction operations; and minimise the negative impacts of these operations.**

Strongly agree

**Why?**

It won't happen, it will always be a huge risk so a small number of people make a huge profit.

**Principle: Engage with stakeholders and implement management systems to understand and manage impacts, and realise opportunities for redress where needed.**

Strongly agree

**Why?**

Why do you need to understand impacts we are already at the cusp of destruction it is frustrating reading this, it is like you are in denial about climate change.

**Are there any other principles you would like us to consider in the strategy?**

**Action areas intro**

**Action Area: Modernising the Crown Minerals Act**

Strongly agree

**Why?**

Because fossil fuels need to be regulated out of use.

**What future actions would you like us to consider under this Action Area?**

Banning use of fossil fuels or anything else that will destroy the planet.

**Action Area: Securing affordable resources to meet our minerals and energy needs**

Neither agree nor disagree

**Why?**

Because I don't understand what resources you propose to meet our minerals and energy needs you propose to use. It doesn't matter how affordable something is if it will destroy the planet.

**What future actions would you like us to consider under this Action Area?**

**Action Area: Improving Treaty partnership**

Neither agree nor disagree

**Why?**

How are you going to improve it? If it means giving Maori the right to use fossil fuels then I strongly disagree, if it means giving maori the right to ban fossil fuels then I strongly agree.

**What future actions would you like us to consider under this Action Area?**

By making it clear what you are talking about.

**Action Area: Improving stakeholder and community engagement**

Strongly agree

**Why?**

Because you are allowing the destruction of the planet under the feet of the people who voted you in.

**What future actions would you like us to consider under this Action Area?**

**Action Area: Improving industry compliance**

Strongly agree

**Why?**

Because they are only interested in making a buck.

**What future actions would you like us to consider under this Action Area?**

**Action Area: Research and investment in better mining and resource use**

Strongly disagree

**Why?**

Because there shouldn't be anymore use of mining.

**What future actions would you like us to consider under this Action Area?**

Ban mining of coal.

**Are there any other action areas you would like us to consider as part of advancing this Strategy?**

**Other**

**Are there any other comments you would like to make about the “Minerals and Petroleum Strategy for Aotearoa New Zealand: 2019-2029”?**

Stop sucking up to fossil fuel exploiters and save the planet before it is too late.

**If you wish to, attach a document to this submission.**

**Use and release of information**

**We intend to upload submissions to our website at [www.mbie.govt.nz](http://www.mbie.govt.nz). Can we include your submission on the website?**

Yes

**Can we include your name?**

No

**Can we include your email address?**

No

**Can we include your business name or organisation?**

No

**Can we include your position title?**

No

**Can we include the group you most identify with (if submitting as an individual)?**

Yes

**Can we include the group your submission represents (if submitting on behalf of a group or organisation)?**

**If there are any other parts to your submission that you do not want public on the website please note them below:**

**OIA publishing warning**

**If there is information in your submission that you wish to remain confidential, please note them below:**

Just private information.
